<div align="center">

Project Owner: Asha Said
Project Name: Online Doctors

</div>

Problem Statement

Due to the pandemic, many people have stopped going to the hospitals due to the outbreak cricis fearing they might get into contact with the virus or even worse (getting quarantined). They were also advised not to often leave their homes thus seeking medical advice became pretty challenging and also due to the outbreak the hospitals were jam-packed getting the doctor's attention became nearly impossible.

Solution

Create an online application/platform that allows Patients and Doctors to communicate and help in providing Medical advice in the safest way possible.
